Marco Provenzale - Oil painting on an electronic board sketched on canvas.

Fans and art lovers will be thrilled to know that Marco Provenzale's much talked about work "L'Ombra della Croce", fiercely actual, describing the pain of a world overwhelmed by Evil, has been selected for the Modern Art Exhibition of the 2016 Jubilee which will take place in Rome from May 19 – 26 at the Bramante Hall in Piazza del Popolo.

Painter Marco Provenzale lives and works in Italy, precisely in Catania, Sicily, where he works as a homeopathic doctor. He's in love with any kind of visual art. He has a deep passion for medicine as well as for all visual arts, especially painting.

His style is a fusion of photography, design and painting. It has evolved through a complete recovery of oil painting on an "electronic board" sketched on canvas.
