## ACREOS – TRAINING PERFORMED BY SIMULATION

As an innovative learning solutions designer, we have been offering, since 2007, training tools dedicated to the heavy equipment industry (mining, ports, handling & lifting, HGV PCV, construction, ...).

Our teams design and develop training methods integrated to last-generation and ultra-realistic simulators. Our simulation solutions, result of years of research, are reliable and proven by several training organisations and well-known companies.

Our main goal is to change dramatically the driver training, to improve skills, to allow a risk-free learning and to enhance efficiency. With more than 10 years' experience, we successfully deployed methods and simulation platforms in more than 35 countries and have already trained over than 100 000 trainees.

Aramine, leader in mining and underground solutions, is offering a large range of products and services through its 3 divisions.

First, Aramine equipment division manufactures a complete range of narrow-vein mining machines (launching his first battery-powered miniLoader® in 2016), as well as providing a remanufactured machine program supported by service and maintenance.

Aramine is also a recognized distributor for Epiroc underground mining equipment (loaders, trucks Drill rigs), for Normet service vehicles, scalers and shotcreting products and for BTI booms, hammers and demolition tools, in targeted geographical areas, through its distribution division.

Aramine OES parts division provides genuine spare parts, components and mining accessories from different brands supported by a strong after sales service including experienced technicians for training, audit, start-up or repairs.

iDig, the Excavator Grade Control REVOLUTION!

The most innovative, real time Grade Control Tool for any excavator, back hoes, mini excavators.

Control your excavator grade more effectively, gaining more accuracy and higher safety.

- No cables
- no-welding
- Fast & easy
- No-drill install & setup
- Solar charged radio sensors
- Touchscreen
- In-cab LED indication
- Affordable even for compact machines

Highly portable, move it from one machine to another in minutes. Many extra functions, most industry-unique, such as main boom swing control, UR-compensation, auger attachment control in elevation and verticality, front blade grade assistance, remote access, and others. Ideal also for hire plants. Worldwide availability.

### Aude DARMON

Communication Specialist  
fcm-communications@faurecia.com

Founded in 1997, Faurecia has grown to become a major player in the global automotive industry in its three areas of business : automotive seating, interior systems and clean mobility.

Faurecia is developing technologies to improve air quality and energy efficiency for passenger and commercial vehicles.

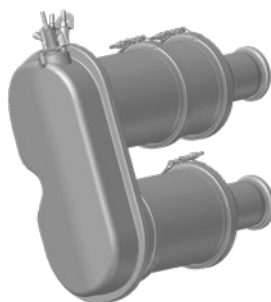

Following the recent acquisition of HUG Engineering, which offers complete systems for exhaust gas purification of High Horsepower engines, Faurecia is now a leading player in on-highway and off-highway segments.

The Group is also developing innovative solutions for zero emission transportation such as fuel cell and battery technologies, with the objective to drive a greater sustainable mobility.

### Fuel Cell solutions

Electric vehicles solutions with increased autonomy and quicker refueling time

### U-Mix

Excellent NOx reduction and packaging flexibility via high performance urea reductant mixing

- Aftertreatment and zero emission solutions for on and off highway applications

LumiAir, World Leader in Lighting Balloons, lightens up the roads of the world

## COMPANY

Patented worldwide, 3 gold medals at the Convention of GENEVA and European Oscar for lighting products. LumiAir lighting balloons have become the essential lighting devices for night work within the construction, tunnel, roadwork, civil defense, rescue operation sectors & ATEX areas. Capable of lighting a surface area up to 12,000 m<sup>2</sup> per unit, provide a uniformed light source at 360° without glare and weather resistant. LumiAir, a French international company, is certified ISO 9001-2015 and ATEX.

LumiAir produces and sells a range of standard lighting products and can develop specific lighting systems on request.

## PRODUCTS

- Light Diamond: Small and compact balloons to provide instant light around the vehicle
- LumiKart: Compact autonomous units which included generator, mast, balloon and trailer
- LumiTex: ATEX range of products (for hazardous atmosphere): oil and gas extraction, mining, dust environments and chemicals plants...
- LumiSphere: Permanent lighting systems for very large areas

MS supplies solutions and services related to water conservation and sand valorisation.

We wish to contribute to virtuous and valuable constructions.

MS designs, manufactures, installs reliable and efficient solutions for liquid/solids separation worldwide, in four various range of activity : Mineral Industries, Underground works, Water treatment and Recycling.

Our solutions :

- Valorisation of sand and gravels through washing and classification with industrial management of water
- Slurry treatment plants.
- Solutions enabling water and industrial effluents to be clarified (construction, steel or food industries).
- Recycling and valorisation of polluted soils, water or sludge.

thierry.rolland@rb3d.com

RB3D is a French company founded in 2001 and specialized in Exoskeletons and cobots.

Facing a strong growth in occupational diseases in the industry, RB3D proposes innovations to reduce the Musculo Squeletal Disorder (MSD) risks.

Specific work place improvement, smart tools, collaborative robots (cobots), these are RB3D's main ways to assist people at work with strength and gesture support solutions.

One of RB3D's innovations is called EXOPUSH, an exoskeleton designed for the road construction workers who are levelling hot, cold mixes or concrete with a rake. EXOPUSH is the perfect tool for reducing penibility at work and make road workers leveling with minimum efforts.

Main benefits:

- Multiplied force
- Improved posture
- Precision preserved

## HYDRAULIC CYLINDERS – INNOVATION AND HIGH QUALITY

SAHGEV, was started in 1981 and is a key player in the conception and manufacturing of hydraulic cylinders. Our products are used in all the sectors of the mobile hydraulic equipment's (construction, handling, agriculture, transport, environment...)

Our modern and automated production means as well as our innovative solutions are the stands of our partnership with the main manufacturers of those market segments.

Thanks to our sales office located in Germany we have increased our client portfolio in Germany and all over Europe. We are not only present this area, but also in almost all the countries worldwide.

SAHGEV produces more than 550 000 cylinders with 350 employees all around the world (80% export).

Sahgev innovates for its customers

The integration of additional functions as sensors, assembly of hydraulic components are parts of our current projects. There are also important factors, like for example the empty weight which is taken into account when the vehicles are designed;

It has an impact on the consumption of fuel, on the road approvals or on the increased loading capacity. We propose cylinders with hollow rods to reduce the weight to 30%.

**Construisons ensemble**  
Let us build together

### SAUDEM MAZIERE

4 rue du Nouvelet  
BP 87  
94311 ORLY CEDEX  
France

### Philippe PELLETIER

CEO  
Ph.: +33 (0)1 48 52 80 00  
bauma2019@saudem.com

SAUDEM buys and sells second hand cranes made in Europe (Potain, Liebherr, Comedil) and provides original spare parts for European tower cranes.

We have 50 years of experience in the following fields:

- sale of cranes (Potain, Liebherr, Comedil)
- packing and loading of cranes in 40 feet high cube containers
- spare parts 100% European origin
- motors and reducers overhaul
- erection, dismantling of cranes

We can also export/import second hand components such as chassis, mast sections, telescoping cages, etc.

Our competitive prices and huge stock allow worldwide fast deliveries.

From your purchase of crane to arrival at destination, we take care of every aspect: packing, logistics, transport, management of documents.

SAUDEM contributes to the success of your company.

ludovic.broquereau@sequanta.io

Lifting equipment, building machinery, trucks and other vehicles are largely subject to hard constraints (chocks, vibrations, weather conditions...). SEQUANTA simplifies the access to decisive data in complex situations enabling to optimize the management of mobile assets.

SEQUANTA SIGNAL ONE wireless Low Power Edge computing Appliance processes data from its internal GPS and MEMS sensors and other wireless sensors. Combined with the SEQUANTA CORE software platform, SIGNAL ONE is the cornerstone of a complete offering for abnormalities detection and monitoring of running conditions.

SEQUANTA solutions are best suited to:

- Build knowledge & enable agile operations,
- Characterize data & trigger actions,
- Deploy on existing assets with easy retrofitting,
- Use on field low power processing.

[vincent.gouraud@setforge.net](mailto:vincent.gouraud@setforge.net)

SETFORGE is a leader group in forged and machined components.

With 9 plants we can propose almost all the technologies of forging (hot forging, upset forging, warm forging and cold forging).

With more than 100 years experience we have a long history as supplier of components for the construction equipment and mining equipment

We are currently supplying parts among other customers to Caterpillar, Volvo CE, Liebherr, CNH, Komatsu and Doosan.

We can deliver forged or fully machined components.

### Off-Highway • Mining

- Forged and machined components for transmissions, axles, chassis and hydraulic cylinders

Cel.: +33 (0)6 87 65 27 46  
kevin.bernard@richel.fr

European Leader in storage shelters, the company Richel Group has developed new storage solutions ranging from 8 to 25 m wide and a height from 3,6 up to 17 meters roof ridge specifically dedicated to industry professionals.

SHELTERALL®, is a modular metal-textile construction and quick to assemble. It is installed without foundation on all types of soil (earth, concrete, bitumen, asphalt) or supports (simple wall or concrete block type Lego).

Its optimized design offers a storage solution at lower costs. The construction principle is based on a galvanized steel structure of very high quality. The shape has been optimized to offer optimal resistance to snow and wind in accordance with the Eurocode NF EN 1993-1-1 standard. The PVC coated tarp with 650g/m<sup>2</sup> up to 900g/m<sup>2</sup> is classified B1 flame retardant.

Shelterall is particularly suitable for storage of bulk material and industrial products

Our Sales Representatives and Project Managers are always available to visit your sites, study your projects and provide you with a « turnkey » solution adapted to your needs.

WATTALPS is a European battery manufacturer making safe, modular and high performance batteries for the off-road market. We provide to our customers:

- **Full day autonomy:** highest energy density reaching 300 Wh/L
- **No compromise on Safety:** 3 safety barriers with automotive standard electronics, cell assembly and rigid metal casing to segregate defaults
- **A CAPEX divided by 10** to equip a new machine: modular batteries with high performance & low development cost
- **A time-to-market divided by 3**
- **Full power at any time:** state-of-the-art liquid cooling
- **4-season operation:** heater and chiller included
- **Connected:** online services to optimize your battery fleet
- **100% electric construction site:** a range of **mobile battery gensets** to energize your off-grid site

WATTALPS is the enabler for full electric construction equipment.
